

## Inputs

- Generating new knowledge - measuring the impact, successes, and failures of civic tech initiatives across Africa.
- To assemble and connect - and link in with global civic tech networks (south-south and south-north), promoting engaged networks of African civic tech innovators.
- Aggregate [case study](#) data to identify key issues and trends to understand and analyse civic tech practices and ecosystem impacts in Africa.
- Stimulate learning and innovation from practice and informing various ecosystem actors on how to best support and achieve impact.
- Contribute to learning / training / curriculum in relation to civic roles in digital innovation and governance.

## Desired outcomes

- Examining the learning and practice impacts of using the case studies approach as a methodology. This is not only limited to case studies but other approaches.
- A targeted approach impact assessment framework.
